Taonga
Computer Science graduate researcher, full-stack developer, and AI/ML practitioner
Zambia / China professional background

Professional Summary

Computer Science professional with a Bachelor’s degree in Computer Science and Technology and ongoing Master’s research in AI and Machine Learning. Experienced in building web, mobile, and WeChat Mini Program applications, teaching Python, coordinating multilingual teams, and translating technical communication across English, Chinese, and Nyanja.

Computer Science Focus

Primary professional focus: software development, AI and Machine Learning research, full-stack application building, and technical education. Strongest work includes student productivity tools, e-commerce, bilingual accessibility applications, and AI/ML research foundations.

- AI and Machine Learning research with experience in neural networks, CNNs, RNNs, Transformers, time-series prediction, wind forecasting, data preprocessing, model evaluation, hyperparameter tuning, GPU training, data cleaning, data visualization, and statistical analysis.
- Full-stack and frontend development across HTML5, CSS3, React, TypeScript, Vite, Java, Django, MySQL, and database-backed application design.
- Mobile and mini-program development using Flutter, Dart, Material Design, local storage, and WeChat Mini Program technologies.
- Technical teaching and mentoring through beginner Python instruction for children and students with different learning needs.

Technical Skills

Programming Languages: Python, Java, C#, Dart, TypeScript, HTML5, CSS3
AI and Machine Learning: PyTorch, Neural Networks, CNNs, RNNs, Transformers, Time-series prediction, Wind forecasting, Model evaluation, GPU training, Ollama, Local LLMs
Web Development: React, Vite, Django, HTML5, CSS3, MySQL, Session management, Database integration
Mobile and Mini Programs: Flutter, Dart, Material Design, Widgets, Navigation, Local storage, WeChat Mini Programs, WXML, WXSS
Developer Tools: Git, VS Code, PyCharm, Linux, Figma, Notion

Featured Projects

Study Tracker and Exam Planning Web App

Student productivity platform. A web app for tracking study time, subjects, goals, and exam preparation. Includes a study calculator that estimates needed study hours from page count, average words per page, material difficulty, and time remaining.
Role: Conceived the product, designed workflows, developed the frontend interface, implemented tracking and calculator features, tested and refined functionality, and used AI tools while validating generated code.
Achievement: Combined educational planning and software engineering into a practical productivity tool for students.
Technologies: React, TypeScript, Vite, HTML5, CSS3, OpenAI Codex, ChatGPT

Canteen Recommendation System

Bilingual campus accessibility app. A bilingual English-Chinese food recommendation system built as a WeChat Mini Program to help foreign students understand available meals.
Role: Led project planning, coordinated a four-member team, delegated responsibilities, assisted development, designed bilingual functionality, and tested the application.
Achievement: Won 2nd Place in an Innovations in IT Software Programming Competition.
Technologies: WeChat Mini Program, WXML, WXSS

Online Cupcake E-Commerce Website
Full-stack web commerce project. A modern e-commerce platform where customers can browse cupcakes, view product information, add items to a cart, and place orders online.
Role: Designed and developed the frontend, built responsive interfaces, implemented product browsing and shopping cart functionality, connected the frontend with backend/database logic, and improved UI/UX through testing.
Achievement: Delivered a complete online ordering platform and strengthened full-stack development and user-centered design skills.
Technologies: HTML, CSS, Java, Database integration

Task and Project Management Application
Flutter productivity app. A mobile application for organizing tasks and projects through a dashboard-style interface.
Role: Designed the app interface, built task management features, developed project organization workflows, implemented user interactions, and tested functionality.
Achievement: Strengthened project management, agile planning, team communication, delegation, and feature prioritization skills.
Technologies: Dart, Flutter, Material Design

Online Business Management System
Inventory management system. A web-based business management system for inventory tracking and operational visibility.
Role: Developed application features using Django and web development technologies.
Achievement: Applied backend web development and inventory management concepts.
Technologies: Django, HTML, CSS

Experience
Translator / Assistant Manager, Grading Department | Twyford International - Keda Ceramics | 2026-Present
- Supervise and coordinate warehouse grading personnel, including teams of more than 50 employees.
- Translate operational instructions and workplace communication between Chinese, English, and Nyanja.
- Inspect and grade ceramic tiles, identify defects, perform measurements, and support quality standards.
- Perform data entry using SAP Logon and maintain departmental records, reports, and documentation.
- Serve as a departmental safety representative and help address health, safety, equipment, HR, and workflow issues.

Python Teacher | Teaching Kids Python, Freelancer | 2024-Present

- Plan and deliver beginner Python lessons using age-appropriate explanations and exercises.
- Guide students through coding projects and adapt lessons to different learning styles and skill levels.
- Encourage logical thinking, problem solving, confidence, and constructive learning habits.

Publicity Minister, Graphic Designer and Social Media Coordinator | Association of Zambian Students in China | 2023-2024
- Designed promotional materials for student events, campaigns, announcements, and organizational activities.
- Managed social media presence and coordinated publicity strategy with executive committee members.
- Improved consistency and professionalism across public communications for Zambian students in China.

TikTok Livestream Anchor | Kureiji Anime Collectors | 2025
- Hosted live TikTok shopping streams for audiences in the United States.
- Presented anime trading cards and collectibles, answered customer questions, and maintained viewer engagement.
- Helped increase TikTok store sales by 72% within one month.

ESL Teacher and Private Tutor | KinderHouse, Nanjing Xinxin Engineering University, Beida Jingxue Affiliated Experimental Kindergarten, Yilin Education, Private Tutoring | 2022-Present
- Taught English as a second language to Chinese students aged 2-15 in classroom and one-on-one settings.
- Planned engaging lessons, adapted instruction to student progress, and communicated with Chinese staff and parents.
- Used ESL resources including Power Up, Get Set Go, Oxford Phonics World, and Hello Giraffe.

Education
Master’s in Computer Science and Technology | Nanjing University of Information Science and Technology | 2023-2026
- Current research in AI and Machine Learning
- Current GPA: 3.55
Bachelor’s in Computer Science and Technology | Henan University of Urban Construction | 2019-2023
- Completed with cumulative GPA: 3.52

Certifications and Recognition
- Coursera: Use Canva to Design Digital Course Collateral
- Recommendation letter from the Ambassador of the Embassy of the Republic of Zambia in China for service in AZSIC

Languages
English: Native speaker
Chinese: HSK4; technical discussions, classroom communication, document translation, presentations, and Chinese-language teaching contexts
Nyanja: Zambian language
